ABOUT US

Anyang Feeker Building Materials Co., Ltd. stands as a prominent manufacturer of space capsules in China and across the globe. Established in 2014 and nestled in the culturally rich city of Anyang, our company is home to a team of over 100 dedicated professionals and 15 seasoned engineers. We pride ourselves on our state-of-the-art manufacturing facilities and a portfolio of proprietary technologies.

Our space capsules, which undergo stringent certification processes, are designed to cater to a diverse array of applications in space exploration and habitation. It is our commitment to excellence in product quality and cutting-edge innovation that has allowed us to extend our reach globally. Our space capsules have been exported to various countries, garnering acclaim and recognition in the international market for their unparalleled performance and reliability.

Product introduction

Versatile Applications

Whether serving as a boutique hotel, an internet-famous restaurant, a mobile exhibition hall, a gym, or a library, the Apple Capsule meets a variety of needs with its unique charm and practicality.

Intelligent Living

With its refined interior and complete configuration, the Apple Capsule integrates advanced technological equipment to provide users with an intelligent living and working environment. It allows for creativity and imagination to flourish while maintaining high efficiency and energy conservation.

Flexibility and Mobility

The quick installation and mobility of the Apple Capsule enable it to easily adapt to various terrains and environments. Whether in the city or the countryside, it can quickly become a beautiful landscape.

Eco-Friendly and Energy-Efficient

The Apple Capsule adopts environmentally sustainable materials, focusing on minimizing energy consumption, and is dedicated to the concept of green architecture. Its design is rooted in reducing environmental impact while providing a high-end comfortable living experience.

Aesthetic Design

Inspired by the clean lines of technological products, the Apple Capsule's appearance resembles an Apple iPhone, with rounded edges and a full-height glass exterior. This not only enhances the building's visual appeal but also allows for close contact with nature.

In the realm of modern architecture, the Apple Capsule leads the trend of modular construction with its unique design philosophy and multifunctionality. This type of building not only reflects respect for the environment through its eco-friendly materials and construction methods but also offers users an unprecedented level of convenience and comfort with its excellent intelligent space and flexible mobility.
