Introduction to Detachable Container House

Detachable Container House: An Eco-Friendly, Flexible, and Efficient Housing Solution constructed from prefabricated container components, allowing easy disassembly and assembly for various applications, including temporary, mobile, and long-term housing; its construction process is eco-friendly with dry work methods that don't harm the natural environment, and it offers exceptional flexibility as standard-sized container units can be assembled horizontally and vertically to meet diverse project needs; featuring a main structure composed of galvanized steel frames and fireproof glass wool sandwich panels, it excels in fire resistance, sound insulation, heat preservation, and earthquake resistance; representing the future of housing, it emphasizes sustainability, adaptability, and efficiency, providing an ideal solution for a wide range of needs.

-  **Disassemblability:**
Easily taken apart and reassembled, suitable for various scenarios.
-  **Environmentally Friendly:**
Eco-friendly construction, non-polluting, and reusable.
-  **Flexibility:**
Applicable to diverse projects, allowing for multi-level assembly.
-  **High-Quality Construction:**
Utilizes steel frames and fire-resistant materials, demonstrating excellent performance.
-  **Efficiency:**
Short construction time, meeting urgent requirements.

INTERIOR WALL BOARD

bamboo and wood fiberboard

Advantages of bamboo wood fiber board

1. Easy to clean: the treated appearance is easy to clean and sanitary, can be directly wiped with water, no blistering and deformation.
2. Fashionable and elegant: rich and diverse types, many colors, can be designed and matched according to personal preferences, elegant and exquisite.
3. Time saving: using ordinary buckle board device, it can be directly folded, spliced and overlapped, easy to install and reduce decoration time.
4. Super sound insulation: the sound insulation effect reaches twenty-nine decibels, which is similar to the real wall, making the room quiet and comfortable.
5. Super hardness: made by using original ecological bamboo wood fiber to improve hardness, anti-collision, anti-friction and not easy to scratch.
