ABOUT US

Anyang Feeker Building Materials Co., Ltd. stands as a prominent manufacturer of space capsules in China and across the globe. Established in 2014 and nestled in the culturally rich city of Anyang, our company is home to a team of over 100 dedicated professionals and 15 seasoned engineers. We pride ourselves on our state-of-the-art manufacturing facilities and a portfolio of proprietary technologies.

Our space capsules, which undergo stringent certification processes, are designed to cater to a diverse array of applications in space exploration and habitation. It is our commitment to excellence in product quality and cutting-edge innovation that has allowed us to extend our reach globally. Our space capsules have been exported to various countries, garnering acclaim and recognition in the international market for their unparalleled performance and reliability.

Product introduction

Experience the serenity of nature with our soundproof and watertight capsule design, which guarantees a quiet retreat where your conversations and rest remain undisturbed. The expansive 270° panoramic windows act as a frame for the ever-changing natural landscape, allowing you to bask in the first light of dawn and gaze upon the star-studded night sky, all from the comfort of your abode.

Selecting our space capsule is not just about choosing a novel living arrangement; it's an affirmation of a lifestyle that resonates with the rhythm of the Earth. Join us on this enchanting voyage, where every day is a new discovery and every night a celestial embrace.

Luxury Eco-Capsules: Vacation Living Reimagined

Dive into a revolutionary concept of living that seamlessly integrates cutting-edge technology with the warmth of home comforts. Our space capsule is a tribute to the adventurous spirit, crafted to offer a secure and intimate sanctuary where the frontiers of nature meet the amenities of modern life. The interior is thoughtfully designed to maximize space, equipped with a complete set of furniture and essentials, creating a harmonious blend of functionality and relaxation.

Built with state-of-the-art materials and technology, our capsule ensures a robust and comfortable shelter, ready to withstand the elements while enveloping you in the tranquility of your surroundings. The interior layout is a marriage of practicality and elegance, featuring a distinct separation between wet and dry areas in the bathroom and an open plan living space that invites relaxation and contemplation.

WARM HOUSE

Installation and transportation

Transport stage

The standard purchase contract of VESSEL series products includes the transportation cost, and our company will uniformly arrange the truck transportation to the project site. The standard truck is 13.5m long semi-trailer, the transport width is 3m, and the transport height is not more than 4.2m, which can be freely passed on the national highway.

Hoisting stage

After the goods arrive at the scene, customers need to contact the local crane service, our technical team will arrive at the scene in advance to guide. The lifting weight of all series products of VESSEL ranges from 6 to 10 tons, and it is recommended to use cranes of not less than 25 tons for loading and unloading.

Installation phase

Before installing the product, the customer needs to complete the site engineering of water supply, power supply, sewage pipeline and load-bearing foundation according to our company's VESSEL product standard basic hydropower drawings. Under the guidance of our technicians, the precise location to the design of the installation point to connect the water and electricity, complete the water and power test, to the customer acceptance.

PRODUCT SMART SYSTEM

Intelligent upgrade

Traditional room hardware intelligent upgrade, can only AI customer service, help the hotel to reduce costs and increase efficiency, improve the guest experience.
